## INTRODUCTION

Regional Statistics, New South Wales contains principal statistics for statistical areas of the State.

The publication presents data for statistical areas based on the Australian Standard Geographical Classification. Table 1 contains labour force status of the population classified into statistical regions of the State. Tables 2 to 14 contain demographic and economic statistics: Table 2 contains data for the State and its component statistical divisions; and Tables 3 to 14 contain data for each statistical division with its component statistical local areas arranged alphabetically.

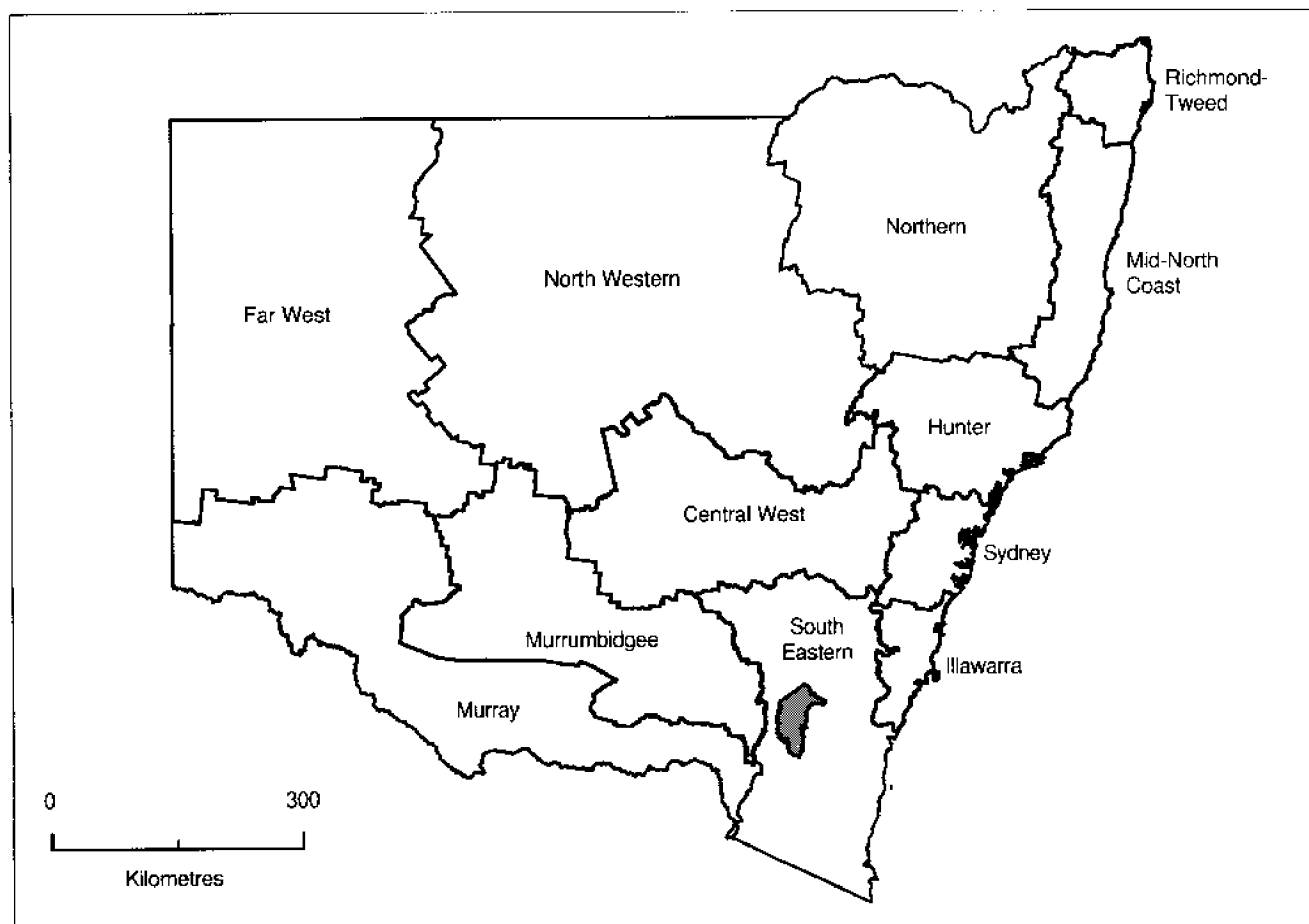

Australian Bureau of Statistics (ABS) publications draw extensively on information provided freely by individuals, businesses, governments and organisations. Their continued cooperation is very much appreciated; without it the wide range of statistics published by the ABS would not be available for general use by the community. Information received by the ABS is treated in strict confidence as required by the Census and Statistics Act.

The data contained in this publication represent only a sample of the full range of statistics available from the ABS. For further information about ABS statistics and services, refer to page 92 of this publication.

# STATISTICAL DIVISIONS OF NSW

## GEOGRAPHY

For the purpose of presenting the principal series of official statistics for the State, New South Wales is divided into a number of geographical areas. These areas consist, for the most part, of aggregations of local government areas.

The primary division of the State is into twelve *Statistical Divisions*. These are intended to represent 'regions' of the State which are characterised by discernible social and/or economic links between the inhabitants and economic units within them, under the unifying influence of one or more major cities or towns. The boundaries of the divisions have accordingly been delineated on the basic criterion that the degree of economic and/or social contact and interaction within each division should be maximised. It should be emphasised that the boundaries of the divisions cannot be regarded as sharp lines of demarcation—they may, of necessity, be positioned within peripheral zones in which the influence of two or more 'focal' cities or towns overlap in varying degrees.

# LABOUR FORCE

## 1 LABOUR FORCE STATUS OF THE CIVILIAN

			Sydney (MSR)					
Item no.	Particulars	Unit	Inner Sydney and Inner Western Sydney (SRs)	Inner Sydney (SR)	Eastern Suburbs (SR)	St George-Sutherland (SR)	Canterbury-Bankstown (SR)

## GEOGRAPHY

The Division consists broadly of the Cumberland Plain. To the north of the Plain, it includes the moderately elevated Hornsby plateau and, beyond the Hawkesbury River, the coastal lowland plains containing Gosford and Wyong. To the north-west, north and south-west of the Cumberland Plain, the Division comprises the Blue Mountains and other associated ranges. The southern part of the Division is mainly composed of the moderately elevated Woronora Plateau. The region has a warm, humid climate, except for the higher parts of the mountain ranges where temperatures are cooler, with heaviest rainfall normally occurring in summer and autumn. Rainfall is markedly irregular and declines from east to west. Sydney is the focal point of the State's rail, road and air services. It also provides port facilities for overseas, interstate and intrastate shipping. It is the seat of public administration for the State, and the leading commercial, industrial, financial, educational and cultural centre.

# HUNTER STATISTICAL DIVISION

A list of statistical area codes and their names are shown in Appendix A.

## GEOGRAPHY

The Hunter river and its tributaries in this Division form one of the largest river valleys on the New South Wales coast. To the north and south the area is enclosed by rugged highlands, while to the west less rugged highlands give easy access to the New England areas. The climate is generally of the warm, humid type, with heaviest rainfall normally occurring in summer and autumn. Rainfall decreases markedly in amount and reliability from the coast inland. Railways traverse the region, linking the most important towns, and a highway closely follows the main northern mail route.

# ILLAWARRA STATISTICAL DIVISION

A list of statistical area codes and their names are shown in Appendix A.

## GEOGRAPHY

The coastal portion of the Division consists of a discontinuous coastal plain where a series of river valleys (Minnamurra and Shoalhaven) alternate with spurs of more elevated land extending eastwards from the tablelands. To the west of this coastal plain is a long escarpment which gives way to exceedingly rugged terrain in the Shoalhaven area, and the land in the north-western part of the Division consists of undulating tablelands. The climate is generally of the warm, humid type, with heaviest rainfall occurring in summer and autumn.

Rail communication in the Division comprises the Illawarra line extending through the coastal belt and terminating at Nowra; the main southern line passing through Bowral; and a connecting link (Unanderra-Moss Vale), which is used mainly for goods traffic. Highway communication follows a similar pattern, with a coastal road, a tablelands road, and several roads linking the Bowral area with the Illawarra Plains districts.

# RICHMOND-TWEED STATISTICAL DIVISION

Legend					
	Statistical Division boundary		River		Locality
	Statistical Local Area boundary		Road		Statistical Local Area ASGC code

A list of statistical area codes and their names are shown in Appendix A.

## GEOGRAPHY

The Division consists of two major coastal river basins (of the Richmond and Tweed rivers) and a river valley (of the Upper Clarence River). It is enclosed on the north by the rugged McPherson range, on the west by the more easterly extensions of the New England Plateau, and on the south by the less rugged Richmond range. The Richmond Range extends northerly into the Division and separates the river valley from the coastal basins. The climate of the region is humid sub-tropical. The rainfall varies in intensity and occasional severe flooding occurs. The area has a rail and road system cutting the river system at right angles, and a highway linking the coast to the hinterland.

# MID-NORTH COAST STATISTICAL DIVISION

Legend					
	Statistical Division boundary		River		Locality
	Statistical Local Area boundary		Road		Statistical Local Area ASGC code

A list of statistical area codes and their names are shown in Appendix A.

## GEOGRAPHY

This Division covers the coastal strip extending from Wallis Lake in the south to the Richmond Range in the north, and comprises a series of valleys running generally east-west (valleys of the Clarence, Macleay, Hastings and Manning Rivers). The valleys have generally been intensively developed for agriculture, while the hills separating the valleys have seen little development. The region has a warm and humid to sub-humid climate. Rainfall is high; occasional severe flooding is a feature of the river valleys. The main road and rail system cuts across the river system and provides a link between areas to the north and south of the Division (e.g. Brisbane to Sydney). Other major roads run from the coast to the hinterland—Grafton to Glen Innes, Kempsey to Armidale, Port Macquarie to Tamworth, etc.

## GEOGRAPHY

There are three identifiable regions in this Division—the northern tablelands (mainly undulating hill lands generally over 1,000 metres above sea level), the northern slopes to the west of the tablelands, and the flat north central plains, watered by the Macintyre, Gwydir and Namoi Rivers. The tablelands is an area with mild summers and cold winters and a moderate rainfall, with the heaviest rainfall occurring in summer. West of the tablelands the summers are warm to hot, with a similar rainfall pattern. Tamworth is the principal city of the Division, and the centre of rail and road systems and air services. The main northern rail line from Newcastle passes through Quirindi, Tamworth, Armidale, Glen Innes and Tenterfield. There is an extensive system linking all of the major towns and cities in the Division.

A list of statistical area codes and their names are shown in Appendix A.

## GEOGRAPHY

There is a diversity of topography in the Division, with elevated lands extending from the central tablelands in the east; gently undulating slopes in the river basins of the Macquarie, Castlereagh and Bogan Rivers in the central areas; and flat plains in the far west. Climatically this region is also diverse but is mostly semi-arid, particularly in the westerly and northerly parts. It has a hot summer and a fairly wide range between summer and winter temperatures. The eastern parts receive about 650 millimetres of rainfall per annum but only half this amount is received in the western portion. The area is well served by railways, with several lines, i.e. from Cobar, Bourke, Brewarrina and Coonamble, focussing on Dubbo—the main economic centre of the region. Other lines connect Dubbo to Parkes, Molong and Orange. At Dubbo the Mitchell Highway, which runs parallel to the railway line to Bourke, intersects the Newell Highway which traverses New South Wales from the Queensland border to the Victorian border.

# CENTRAL WEST STATISTICAL DIVISION

Legend			
	Statistical Division boundary		Statistical Local Area boundary
	River		Road
	Locality		Statistical Local Area ASGC code

A list of statistical area codes and their names are shown in Appendix A.

## GEOGRAPHY

The Division lies to the west of the Blue Mountains and extends to beyond Condobolin. The eastern parts are made up of a number of discontinuous highland areas which contain the source of the Macquarie River, while the western parts—watered by the Lachlan River—are undulating at first, giving way to flat plains. The Bathurst–Orange growth centre is the focal centre of the region. In the cool highland region, rainfall is fairly evenly distributed throughout the year, while in the plains areas the summers are warm to hot, and rainfall is moderate on the slopes, tapering off to light in the west. The Sydney–Broken Hill railway line traverses the region, connecting the cities of Lithgow, Bathurst and Orange. The Mid Western, Newell and Mitchell Highways cross the Division, linking these cities and the urban areas of Cowra, West Wyalong, Forbes and Parkes.

# SOUTH EASTERN STATISTICAL DIVISION

A list of statistical area codes and their names are shown in Appendix A.

## GEOGRAPHY

The South Eastern Division comprises the lower south coast, the Snowy Mountains and the southern tablelands (excluding the ACT). The coastal strip consists of a discontinuous coastal plain where a series of river valleys (of the Clyde, Murrumbidgee, Tuross and Bega Rivers) alternate with spurs of more elevated land extending eastwards from the tablelands. The mountainous Snowy region lies in the south-west corner contiguous to the Victorian border and reaches elevations of over 2,200 metres, the highest in Australia. Snowfields in this area are a major tourist attraction. The tablelands are gently undulating, with elevations of about 750 metres above sea level. The narrow south coast area has a humid cool-temperate climate and an average yearly rainfall of about 900 millimetres. Much cooler temperatures are experienced on the more elevated tablelands, and very cold temperatures occur on the Alps. Average annual rainfall on the tablelands ranges between 500 and 700 millimetres, but in the mountains exceeds 1,400 millimetres. The Division is served by the main southern railway line and branch lines from Goulburn, and by an extensive highway system linking the major population centres in the Division.

# MURRUMBIDGEE STATISTICAL DIVISION

A list of statistical area codes and their names are shown in Appendix A.

## GEOGRAPHY

The Murrumbidgee River traverses the Division from east to west, with the area west of Narrendera containing the Murrumbidgee and other irrigation areas. Wagga Wagga, the major centre of regional significance, is located in the eastern portion of the Division. The region is characterised by cold temperatures in winter in the hilly eastern region, and warm to hot summers and cool winters in the western region. Average annual rainfall (in millimetres) varies from 1,360 at Batlow and 880 at Tumut, to 550 at Wagga Wagga, 620 at Cootamundra, and 330 to 450 in the irrigation areas and more westerly parts. Railway communication is widespread in the Division. The main southern line passes through the eastern section linking Cootamundra, Junee and Wagga Wagga to Albury, and from it many branch lines serve other areas. The branch lines are of particular importance to the wheat industry. Three highways run north to south across the Division, meeting three other highways crossing the Division in an east-westerly direction.

A list of statistical area codes and their names are shown in Appendix A.

## GEOGRAPHY

The entire length of the Murray River on the New South Wales border marks the southern boundary of this Division. The terrain in the western and central parts of the Division is flat, becoming undulating and finally very rugged on the eastern border. The temperature is generally warm to hot in summer and mild in winter. The average annual rainfall (in millimetres) declines from 980 at Tumbarumba in the eastern sector to 700 at Albury and Holbrook, 392 at Deniliquin, 330 at Balranald, and 263 at Wentworth. The main southern railway line and the Hume highway from Sydney to Melbourne pass through Albury, the main centre of population in the Division. The other urban areas in the Division are adequately served by highways passing through the Division and/or extension of the broad-gauge Victorian railway system.

# FAR WEST STATISTICAL DIVISION

Legend			
	Statistical Division boundary		Statistical Local Area boundary
	River		Road
	Locality		Statistical Local Area ASGC code

A list of statistical area codes and their names are shown in Appendix A.

## GEOGRAPHY

The Division comprises the City of Broken Hill, the Shire of Central Darling, and all of the unincorporated area of New South Wales. It is bounded by the Queensland and South Australian borders in the north and the west, and by the boundaries of the Shires of Wentworth and Balranald in the south, and the shires of Bourke, Cobar and Carrathool in the east. The Darling River passes through the region from the north-east to the south. To the west of the river, the extremely flat plains give way to gentle slopes reaching the low, geologically ancient Barrier Range on which stands Broken Hill, the only sizeable city in the far west. The climate is of the semi-arid desert type. Temperatures range from hot in summer to cool and mild in winter. The average annual rainfall is in the range of 200 to 250 millimetres, with maximum rainfall occurring in the summer. The western railway line, which is part of the Sydney-Perth standard gauge line, passes through Broken Hill. The two highways traversing the Division focus on Broken Hill, with the Silver City Highway from Wentworth to Broken Hill and the Barrier Highway from Nyngan through Broken Hill to Gawler (near Adelaide) both being sealed.

## EXPLANATORY NOTES

### STATISTICAL AREAS OF NEW SOUTH WALES

**1** This publication contains data presented according to the Australian Standard Geographical Classification (ASGC). However, due to the unavailability of certain data items on this basis, the information shown has been combined for a small number of areas (specifically those originally formed by splitting local government areas). Under this classification, statistical areas are defined as follows:

#### Statistical Local Areas (SLAs)

**2** These geographical areas are, in almost all cases, identical with, or have been formed from a division of, whole legal local government areas (LGAs) as defined under the (State) *Local Government Act 1993*, and comprise cities (C) and areas (A). Prior to the introduction of this Act on 1 July 1993, these areas were known as cities (C), municipalities (M) and shires (S). In two cases—Unincorporated Far West and Lord Howe Island—they represent areas which are unincorporated under the Act. In aggregate, SLAs cover the whole of the State without gaps or overlaps. In some cases legal LGAs overlap statistical subdivision boundaries and therefore comprise two SLAs (Part A and Part B) or three SLAs in the case of Cabonne (A) (Part A, Part B and Part C).

#### Statistical Subdivisions (SSDs)

**3** These consist of one or more SLAs and form the intermediate size spatial unit for the presentation of regional data.

#### Statistical Divisions (SDs)

**4** These consist of one or more statistical subdivisions (SSDs). Where SSDs are not shown, statistical local areas are ordered alphabetically within statistical divisions. The divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic units within the region, under the unifying influence of one or more major towns or cities.

**5** Further information concerning statistical areas is contained in the publication *Australian Standard Geographical Classification* (1216.0).

### AMALGAMATIONS AND BOUNDARY CHANGES TO LEGAL LOCAL GOVERNMENT AREAS

**6** Where amalgamations of legal local government areas have occurred, figures shown in this bulletin relate to the new areas formed by the amalgamations.

**7** Where boundary changes between legal local government areas have occurred, the figures shown for each legal local government area (or statistical area) generally relate to its boundaries as at the end of the year shown (usually 30 June). However,

- the estimated resident population figures for 1991 to 1994 have been adjusted for the boundary changes that occurred up to and including 30 June 1994;
- building approvals are allocated to the legal local government area in which the building was situated at the time of approval; and
- agricultural statistics relate to boundaries at 31 March 1994.

### BUILDING STATISTICS

**8** Statistics of building work done are compiled from:

- permits issued by local government authorities in areas subject to building control by those authorities;

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

### AGRICULTURAL ACTIVITY

**9** Agricultural statistics shown relate either to the 1993-94 season or are at 31 March 1994.

**10** An *establishment with agricultural activity* is a single physical location which is used for the production of crops (including fruit and vegetables) and/or for the raising of livestock and the production of livestock products, regardless of the predominant activity of the unit. Where two or more locations are within the same statistical local area and are worked as one, they are regarded (for statistical purposes) as forming a single establishment. Establishments which make only a small contribution to overall agricultural production are excluded from the scope of the census. In 1993-94, Agricultural Census establishments with an estimated value of agricultural operations (EVAO) less than \$5,000 were excluded. For the Census years 1991-92 and 1992-93, establishments with an EVAO less than \$22,500 were excluded.

**11** The figures shown for gross *value of agricultural commodities* produced are estimates derived in the following manner:

- For each agricultural commodity produced in New South Wales, a value of production is estimated, for the State as a whole, by valuing the total recorded production at the average annual wholesale prices realised in the market place (in general, the market place is the metropolitan market). This value is then apportioned to the statistical local areas in the State according to the quantity of that commodity produced in the area (obtained in most cases from the Agricultural Census and special supplementary collections). The gross value of agricultural commodities produced for an area is therefore the total of all commodity values which have been apportioned to that area.
- This method of estimation does not take account of differences in unit prices between regions. Beekeeping activities are included in the estimates but the values are apportioned to a particular local government area purely on the basis of the postal address of the operator. Other agricultural activities may be undervalued because some specialist activities are not identified in the Agricultural Census (e.g. studs). For these reasons, the figures shown should be treated as providing only an indication rather than a precise measure of the value of agricultural commodities produced in an area.

**12** More detailed information on agricultural activity in New South Wales is published in *Agriculture, NSW* (7113.1).

## MANUFACTURING

**13** Manufacturing, as specified in Division C of the *Australian Standard Industrial Classification* (ASIC) 1983 Edition (1201.0) broadly relates to the physical or chemical transformation of materials or components into new products, whether the work is performed by power-driven machines or by hand.

**14** The period covered by the Manufacturing census is usually the twelve months ended 30 June. Where businesses find it impossible to supply information on this basis, a substitute accounting period is used.

**15** The next Manufacturing collection for which data will be available for Regional Statistics will be for the 1993–94 reference period. Data from this collection has been coded to the *Australian and New Zealand Standard Industrial Classification* (ANZSIC) which replaced the *Australian Standard Industrial Classification* (ASIC), used prior to the 1992–93 reference year.

## LOCAL COUNCILS— ORDINARY SERVICES

**16** The figures present selected financial aggregates relating to the provision of *ordinary services* (that is, activities other than trading activities) by local councils. They have been compiled from councils' annual statements of account for the year ended 30 June 1995. Detailed data for each council are available as a specialised data service.

## LABOUR FORCE STATUS OF THE CIVILIAN POPULATION

**17** Estimates of the civilian labour force are derived from the labour force survey component of the monthly population survey, which is conducted on a sample basis throughout Australia.

### Monthly population survey

**18** The monthly population survey consists of the labour force survey and, in most months, one or more supplementary topics. The survey is based on a multi-stage area sample of private dwellings (houses, flats, etc.) and non-private dwellings (hotels, motels, etc.) and covers slightly less than one-half of one per cent of the population of New South Wales. The information is obtained from the occupants of selected dwellings by carefully chosen and specially trained interviewers. The interviews are generally conducted during the two weeks beginning on the Monday between the 6th and 12th of each month. The information obtained relates to the week before the interview (i.e. the reference week).

### Scope

**19** The labour force survey includes all persons aged 15 and over except:

- members of the permanent defence forces;
- certain diplomatic personnel of overseas governments, customarily excluded from census and estimated populations;
- overseas residents in Australia; and
- members of non-Australian defence forces (and their dependants) stationed in Australia.

### Reference week

**20** The reference week is the seven-day period preceding the week in which the interview takes place.

### The labour force

**21** The labour force comprises all persons in scope of the survey who, during the reference week, were employed or unemployed as defined below.

## ROUNDING

**22** Where figures have been rounded, discrepancies may occur between sums of the component items and the totals shown.

## SYMBOLS AND OTHER USAGES

C	City
A	Area
MSR	Major Statistical Region
n.a.	not available
n.p.	not available for separate publication (but included in totals where applicable)
p	Preliminary—figure subject to revision
r	figure or series revised since previous issue
S Dist.	Statistical District
SD	Statistical Division
SLA	Statistical Local Area
SR	Statistical Region
SRS	Statistical Region Sector
SSD	Statistical Subdivision
..	not applicable
—	nil or rounded to zero (including null cells)
*	subject to sampling variability too high for most practical purposes

## GLOSSARY

<b>Average annual rate of change</b>	The <i>average annual rate of change</i> in population during the intercensal period 1986 to 1991 has been calculated for the estimated resident population on the basis of boundaries as defined at 30 June 1991; in some instances this has involved a measure of estimation where boundary changes have occurred.
<b>Bed spaces</b>	Refers to the maximum number of beds available (excluding cots) to accommodate paying guests as at 30 June 1995. Three-quarter beds are classified as single beds, and double beds are counted as two bed spaces.
<b>Bed occupancy rate</b>	Refers to the proportion of bed spaces occupied to the number of bed spaces available during the year ended 30 June 1995, expressed as a percentage.
<b>Employed persons</b>	<p>All civilians aged 15 and over who, during the reference week:</p> <ul style="list-style-type: none"> <li>▪ worked for one hour or more for pay, profit, commission or payment in kind (including employees, employers and own account workers) in a job or business, or on a farm; or</li> <li>▪ worked for one hour or more without pay in a family business or on a farm (i.e. contributing family workers); or</li> <li>▪ were employees who had a job but were not at work and were: on paid leave; on leave without pay for less than four weeks up to the end of the reference week; stood down without pay because of bad weather or plant breakdown at their place of employment for less than four weeks up to the end of the reference week; on strike or locked out; on workers' compensation and expected to be returning to their job; or receiving wages or salary while undertaking full-time study; or</li> <li>▪ were employers, own account workers or contributing family workers who had a job, business or farm, but were not at work.</li> </ul> <p>These employed persons can be classified into:</p> <ul style="list-style-type: none"> <li>▪ <i>full-time workers</i> (i.e. those who usually worked 35 hours or more a week (in all jobs) and others who, although usually part-time workers, worked 35 hours or more during the reference week); and</li> <li>▪ <i>part-time workers</i> (i.e. those who usually worked less than 35 hours a week and who did so during the reference week).</li> </ul>
<b>Employment at end of June</b>	The number of working proprietors, working partners, permanent, part-time, temporary and casual employees, and managerial and executive employees working for a location during the last pay period in June. Employees absent on paid or prepaid leave are included. Sole proprietors and partnerships not employing others are excluded.
<b>Estimated resident population</b>	<p>The <i>estimated resident population</i> (ERP) is the official ABS estimate of the population within Australia. The ERP is based on results of the latest population census, and updated for subsequent births, deaths, and overseas and internal migration.</p> <p>Population estimates are based on the final 1991 Census results. Estimates for periods after 30 June 1991 will be subject to revision when the results of the 1996 Census become available.</p>

A description of the conceptual basis of the estimated resident population is contained in *Population Estimates: Concepts, Sources and Methods* (3228.0), published 30 June 1995.

<b>Guest rooms</b>	Refers to the maximum number of rooms, units, suites, etc. available for accommodating paying guests at the establishments as at 30 June 1995.
<b>Locations at 30 June</b>	The number of locations in operation at 30 June. A location equates to the physical site at which manufacturing activity is carried out.
<b>Non-residential building</b>	Classified according to its intended major function. Examples of the types of individual building jobs included under each main functional heading are shown in the following list:
<i>Educational</i>	Includes schools, colleges, kindergartens, libraries, museums, art galleries, research and teaching laboratories, theological colleges.
<i>Entertainment and recreational</i>	Includes clubs, theatres, cinemas, public halls, gymnasiums, grandstands, squash courts and recreation centres.
<i>Factories</i>	Includes paper mills, oil refinery buildings, brickworks, foundries, power-houses, manufacturing laboratories and workshops as part of a manufacturing process.
<i>Health</i>	Includes hospitals, nursing homes, surgeries, clinics and medical centres.
<i>Hotels, etc.</i>	Includes motels, hostels, boarding houses, guest houses and holiday apartment buildings.
<i>Miscellaneous</i>	Includes homes for the aged (where medical care is not provided as a normal service), law courts, orphanages, gaols, barracks, mine buildings, glass houses, livestock sheds, shearing sheds, fruit and skin drying sheds, public toilets, and ambulance, fire and police stations.
<i>Offices</i>	Includes banks, post offices and council chambers, head and regional offices.
<i>Other classes</i>	In addition to Miscellaneous includes Hotels etc., Other business premises, Religious, Health and Entertainment and recreational.
<i>Other business premises</i>	Includes warehouses, storage depots, service stations, transport depots and terminals, electricity sub-station buildings, telephone exchanges, mail sorting centres and broadcasting/film studios.
<i>Religious</i>	Includes churches, chapels and temples.
<i>Shops</i>	Includes retail shops, restaurants, cafes, taverns, dry cleaners, laundromats, hair salons and shopping arcades.
<b>Persons not in the labour force</b>	Those who, during the reference week, were not in the categories 'employed' or 'unemployed', as defined here.
<b>Residential building—house</b>	Defined as a detached building predominantly used for long-term residential purposes and consisting of only one dwelling unit.
<b>Residential building—other</b>	Defined as a building which is predominantly used for long-term residential purposes and which contains (or has attached to it) more than one dwelling unit.
<b>Room occupancy rate</b>	Refers to the proportion of guest rooms occupied to the number of paying guest rooms available during the year ended 30 June 1995, expressed as a percentage.

<b>Takings from accommodation</b>	Refers to revenue received from the provision of both short-term and long-term accommodation at the accommodation establishment. Takings from meals are excluded.
<b>Tourist accommodation establishments</b>	Defined as establishments which provide predominantly short-term accommodation (i.e. for periods of less than two months) available to the general public. The tourist accommodation establishments for which statistics are included in this publication are licensed hotels, motels and guest houses which provide a bath or shower and toilet in most guest rooms and have breakfast available for guests.
<b>Turnover</b>	Sales (exclusive of excise and sales tax) of goods whether produced by the location or not, plus transfers out of goods to other establishments of the same business, plus bounties and subsidies on production, plus all other operating income from outside the location (such as commission income, repair and service income, and rent, leasing and hiring income), plus capital work done by a location's own employees for the business' own use, or for rental or lease. Receipts from interest, royalties, dividends and the sale of fixed tangible assets are excluded.
<b>Unemployed persons</b>	<p>All those aged 15 and over who were not employed during the reference week, and</p> <ul style="list-style-type: none"> <li>▪ had actively looked for full-time or part-time work at any time in the four weeks up to the end of the reference week, and;</li> <li>▪ were available for work in the reference week, or would have been available except for temporary illness (i.e. lasting for less than four weeks to the end of the reference week); or</li> <li>▪ were waiting to start a new job within four weeks from the end of the reference week and would have started in the reference week if the job had been available then; or</li> <li>▪ were waiting to be called back to a full-time or part-time job from which they had been stood down without pay for less than four weeks up to the end of the reference week (including the whole of the reference week) for reasons other than bad weather or plant breakdown.</li> </ul> <p><i>Actively looking for work</i> includes writing, telephoning or applying in person to an employer for work; answering a newspaper advertisement for a job; checking factory or Commonwealth Employment Service notice-boards; being registered with the Commonwealth Employment Service; checking or registering with any other employment agency; advertising or tendering for work; and contacting friends or relatives.</p>
<b>Vital statistics</b>	<i>Births</i> and <i>deaths</i> relate to all registrations of such events which occurred within Australia, irrespective of State of registration, where the usual residence was within New South Wales. Births are allocated to a statistical local area of the State according to the usual residence of the mother, and deaths are allocated according to the usual residence of the deceased (infant deaths are generally assigned to the usual residence of the mother).
<b>Wages and salaries</b>	The gross wages and salaries of all employees of the location. The drawings of working proprietors are excluded.

### D

#### RELATED PUBLICATIONS RELEASED BY THE SYDNEY OFFICE

<i>Cat. No.</i>	<i>Publication</i>
<b>1252.1</b>	<b>National Localities Index, Localities Segment, New South Wales (floppy disk service, annual)</b> An alphabetical list of all localities in New South Wales showing the local government area in which each locality is situated.
<b>3209.1</b>	<b>Estimated Resident Population by Age and Sex in Statistical Local Areas, New South Wales (annual)</b> Contains the estimated resident population by age (in 5-year age groupings) for each statistical local area, statistical subdivision and statistical division at 30 June.
<b>3210.1</b>	<b>Estimated Resident Population of Statistical Local Areas, New South Wales, Preliminary (annual)</b> Area and preliminary estimated resident population of municipalities and shires grouped in statistical areas, at 30 June.
<b>3311.1</b>	<b>Demography, New South Wales (annual)</b> Contains tables and commentary on State trends in population, births, deaths, marriages, divorces and migration. Data includes population estimates, demographic events cross-classified by socio-economic characteristics and various demographic rates. Small area data on births and deaths are also included.
<b>6201.1</b>	<b>The Labour Force, New South Wales and Australian Capital Territory (quarterly)</b> Labour force status of the civilian population aged 15 and over for New South Wales and each region of New South Wales. Employed persons are classified by sex, age, family status, birthplace, status of worker, industry, occupation and full-time or part-time status; unemployed persons by sex, age, industry, occupation and duration of unemployment.
<b>7113.1</b>	<b>Agriculture, New South Wales (annual)</b> Area and land utilisation of agricultural establishments and data on livestock and crops; stocks of major grains, hay and silage; fertiliser and herbicide use and irrigation. Includes data for the Australian Capital Territory.
<b>8221.1</b>	<b>Manufacturing Industry, New South Wales (annual)</b> Presents final results for New South Wales from the Manufacturing Census. Details of the number of establishments; employment; wages and salaries paid; and turnover are shown, classified by industry class. Also contains data on employment size and selected structural data for broad regions.
<b>8635.1</b>	<b>Tourist Accommodation, New South Wales (quarterly)</b> Number of establishments with facilities providing short-term accommodation; hotels, motels and guest houses, caravan parks, holiday flats and units and visitor hostels showing capacity, occupancy rates and takings from accommodation for each month by type of establishment. Includes data by statistical division and selected statistical local areas. For hotels, motels and guest houses, includes data by star grading.
<b>8731.1</b>	<b>Building Approvals, New South Wales (monthly)</b> Number of dwelling units and value of residential buildings approved for private sector and public sector; value of alterations and additions to residential buildings and value of non-residential building by class of building approved.
<b>8741.1</b>	<b>Dwelling Unit Commencements Reported by Approving Authorities, New South Wales (monthly)</b> Contains details of the number of dwellings commenced as reported by approving authorities in local government areas; material of outer walls and ownership (private or public sector) in statistical divisions.
<b>8752.1</b>	<b>Building Activity, New South Wales (quarterly)</b> Number of dwelling units and value of residential buildings, value of alterations and additions to residential buildings and value of non-residential building by class of building; private sector/public sector ownership; stage of construction; value of work done during period, value of work yet to be done; number of new houses by class of builder.
